UPLEX

TECHNICAL BOOK AND Q&A

This guide is used for UPLEX professional hair care products series, more product information and specific instructions can also be accessed at www.yogicos.com.

UPLEX is used as a salon professional products, for any salon with repairing hair, avoiding damage, at the same time, winning a good reputation. This product does not contain any sulfates and associated hazardous substances, to supplement the losing protein during the process of perm, dye, bleach, and fix disulfide bonds.

Operation Guide

No.1 UPLEX ESSENCE

Features: Supplement of cysteine and acid in hair, fix disulfide bonds About 80% of hair fiber consist of cysteine. Cysteine and acid plays an important role in hair fibers and makes big effect, enhances the inside cohesion of hair, completes hair structure, is one of the most important amino acids in keratin. It will cause large loss of cysteine during process of hair coloring, bleaching and perming. The main element of UPLEX ESSENCE is cysteine, through which can repair hair and avoid damage.

No.2 UPLEX PROTECTOR

Features: strengthening hair bond and repair scalp. Creatine, Hydrolyzed keratin and Lactate are the main component of the No.2 UPLEX. Lactate can extend hair squama and Hydrolyzed keratin supplement protein through staying in the seriously-damaged hair cortex. Creatine can repair hair through staying on the surface. No.2 UPLEX is to strengthen hair bond through repairing inner hair.

No.3 UPLEX CARE

It contains elements stabilizing the hair squama and inner part. You can also use it at home to extend the effect of No.1 and No.2 UPLEX.
